Template Manual

Katt HTML

Thank You :)

Thanks for purchasing template and for supporting our work. Katt is our new fancy template. Responsive, clean and professional look with sleek design will satisfy all your needs.

You will need basic HTML, CSS, jQuery skills to edit Katt HTML. We will try to help you out with this documentation.

HTML Structure

Katt consist several HTML files:

- index.html - Front Page
- about.html - About Page
- about2.html - About Page v2
- about3.html - About Page v3
- contact.html - Contact Page
- contact2.html -Contact + Map Page
- single.html - Single Page/Post

index.html - Front Page

On Home page (index.html) are placed several posts/items, and each of them is placed inside **<article>** tag. Code for each post looks like this (there are several different combination of text, images and slider but in general, they are all similar):

```

<article id="post-3" class="relative blog-item-holder">
    <div class="post-thumb thumb-image two_third_thumb left">
        
    </div>
    <div class="post-title-holder one_third_title right">
        <h2 class="entry-title">
            <a href="single.html">What was most significant about the office chairs</a>
        </h2>
        <div class="cat-links">
            <ul>
                <li>
                    <a href="#">Interior</a>
                </li>
            </ul>
        </div>
    </div>
    <div class="clear"></div>
    <div class="zigzag absolute" style="bottom: 40px; right: 331px;">
        
    </div>
</article>

```

Also, on index.html (in first post) is placed image slider. Code for slider looks like this:

```

<script>
    var slider1_speed = "500";
    var slider1_auto = "true";
    var slider1_pagination = "true";
    var slider1_hover = "true";
</script>
<div class="image-slider-wrapper">
    <div class="caroufredsel_wrapper">
        <ul id="slider1" class="image-slider slides center-text">
            <li></li>
            <li></li>
            <li></li>
        </ul>
    </div>
    <div class="slider1_pagination carousel_pagination left"></div>
    <div class="clear"></div>
</div>

```

If you need one more slider, duplicate that code and change “**slider1**” string on several places with new string, for example “**slider2**”. So you will have “**slider2_speed**”, “**slider2_auto**”, id=“**slider2**”, class=“**slider2_pagination**”

contact2.html - Contact Page

On this page you will find the iframe code for google map which looks like this:

```
<iframe  
src="https://www.google.com/maps/embed?pb=!1m14!1m12!1m3!1d4274.290564544589!2d-75.2952832049782!3d40.7536  
69641460846!2m3!1f0!2f0!3f0!3m2!1i1024!2i768!4f13.1!5e0!3m2!1sen!2srs!4v1444506658649" width="600"  
height="450" frameborder="0" style="border:0" allowfullscreen></iframe>
```

To use your own location, go to <https://maps.google.com/> and in left slider menu click on “Share or embed map” - take a look on next image:

You will get popup (next image) where you need to zoom to your place, click on “Embed map” and copy your own iframe code which you need to paste in your “Contact + Map” page.

Share link | **Embed map** 1. 2. copy

Medium ▾ `<iframe src="https://www.google.com/maps/embed?pb=!1m14!1m12!1m3!1d3512`

By embedding this map, you agree to the [terms of service](#).

Mail Configuration

Note: Do not remove any quote or double quote signs while doing this.

One notice: this will be functional only on your server, php file can not be executed on your local computer.

Just add your own email address here in your config.php file.

```
//SITE GLOBAL CONFIGURATION
```

```
$email = "your@email.here"; //<-- Your email
```

Source & Credits

Special thanks to creators and contributors of these awesome libraries, we couldn't have done this without them.
